

# WE CREATE DREAM SOLUTIONS FOR NIGHTMARE SCENARIOS

Escaping an inescapable horror. Staging and fighting a multi-story inferno. Evacuating a fellow firefighter or victim. Whatever your nightmare scenario may be, Life-Pack Technologies (LPT) is working to create equipment so that if that nightmare becomes reality, there can be a happy ending.

LPT was formed in the aftermath of September 11, 2001 – one nightmare scenario we hope to never witness again. Our team brings together veteran firefighters, award-winning engineers and high-rise experts. Together, we're dedicated to creating better IDEAS (Innovative Devices for Escape And Survival) for fire safety and rescue.

## Bailout Buddy™ Hands-free Escape System

This year, we've launched our line of breakthrough solutions, starting with the revolutionary Bailout Buddy™ escape system - for the safest exit and decent. This fully automatic, hands-free device is built with high-strength steel cable that withstands fire temperatures far beyond the capability of Kevlar® or Technora®. When you need to bailout, simply attach Bailout Buddy to a window sill or other anchoring point. Bailout Buddy's internal force limiter will absorb an initial freefall of up to 500 lbs, so you can jump if necessary – even with another person. After bailout, Bailout Buddy quickly lowers you out of danger, gradually slowing your descent as you reach safety.

Bailout Buddy is only the first of our bright IDEAS. Our other innovative devices include:

## 360 Rescue™ Multi-Directional Rescue Device

This multi-purpose device is designed for Rapid Intervention Crews (RICs). With its powerhouse motor, 360 Rescue can help extract victims by raising, lowering or dragging them to safety; it can also be configured to lift a ton or more if a steel beam or other heavy object from a fallen firefighter.

## PAWS™ Personal Anchor Wedge System

PAWS is designed to make bailouts more reliable. This patent-pending device easily secures a hook in the corner of virtually any window, and can be used with Bailout Buddy or any bailout

systems that use a hook as an anchor.

At Life-Pack Technologies, we believe great IDEAS can save lives – including yours.

# WE CREATE DREAM SOLUTIONS FOR NIGHTMARE SCENARIOS

Innovative Devices for Escape And Survival

At Life-Pack Technologies, we are dedicated to improving the quality of multi-story firefighting. How do we do it? Better IDEAS for Fire Safety and Rescue. In 2008, we are launching an entire suite of breakthrough products - starting with **Bailout Buddy™**, a fully automatic, hands-free, steel-cabled escape system that is easy to use and withstands temperatures far greater than rope bailout systems. Our patented controlled descent technology enables the safest exit, safest descent and safest recovery from the worst nightmares.
